**M2M MED** is an innovative, independent clinical trial site specializing in Phase II-IV studies. We offer a full range of services for conducting clinical trials, ensuring meticulous coordination and administration in strict compliance with ICH GCP guidelines, relevant regulatory requirements, and our established standard operating procedures (SOPs).

Our team comprises of highly skilled professionals, including experienced investigators, clinical trial managers, study nurses, and study coordinators. Their expertise allows us to consistently deliver exceptional quality and reliability in every project we undertake.

Our extensive network of specialists enables us to conduct clinical trials across the following therapeutic areas:

- Cardiology
- Diabetology
- Rheumatology
- Hemato-oncology
- Pulmonology
- Psychiatry (CNS)
- Allergology
- Vaccinology
- Internal diseases
- Dermatology
- Neurology
- Orthopedics
- Gastrology
- Endocrinology
- Dermatology

We offer a modern medical and treatment facilities equipped with high-quality, certified devices, including a 24-hour temperature monitoring system.

## About us

- 7 years of experience in clinical trials
- Efficient and dependable feasibility process
- Over 1500 patients randomized
- Extensive and comprehensive team including 25 PI's and SI's across 14 therapeutic specialties
- Simple & streamlined organizational structure
- High quality of services
- CTA review process within 3-4 weeks

Based on our top-tier recruitment results in the fields of diabetology, pulmonology, and cardiology, our team is committed to delivering exceptional outcomes while maintaining a low screen failure rate.

## Quality is Our Priority

We ensure the meticulous management of clinical study sites in full compliance with local regulations, ICH-GCP, Sponsor SOPs, study protocols, and associated documentation.

Our team efficiently manages and maintains clinical trial systems, including eCRF and eTMF.

We coordinate and oversee various study tasks in close collaboration with Sponsors and CROs, adhering to a client-focused approach with flexibility in handling study assignments.

We provide access to a growing database of over 30,000 patients, which we continuously expand to meet the needs of clinical research.

Our extensive collaboration with leading psychiatric and oncology hospitals in the Silesia district and a large network of experienced vendors strengthen our capacity for successful clinical trials.
